KEVIN SALAMON

New York, NY, 10128 | (908) 310-2027 | theksalamon@gmail.com
LinkedIn: linkedin.com/in/kevin-salamon | **GitHub**: github.com/kevin-salamon

SUMMARY

Software Engineer with a background in the construction of comprehensive, client-facing enterprise software. Highly experienced in complete Web Stack with additional use of Java and Spring Boot for API creation and maintenance. Passionate about learning new tech every single day, and looking to work in a team with a similar mindset.

TECHNICAL SKILLS

Languages: Javascript, HTML, CSS
Tools & Frameworks: React.js/Redux, Node.js, PostgreSQL, AWS (S3, EC2, RDS), Firestore + Firebase, Git

PROFESSIONAL EXPERIENCE

Analytic Partners, Inc.   **New York, NY**
Software Engineer II   March 2022 – Present
Mid-level engineer responsible for complete front-end development, maintenance, testing, and integration of the company's React-based predictive market decisioning tool, Agile Learning.
- Pioneered the introduction of React Component unit testing into the application to improve code resiliency, reduce breaking errors, and reduce strenuous workload of the QA team
- Work closely with Product, Data Science, and Design teams to navigate application development through a complete overhaul of application UI and user toolkit

F2B Services, LLC   **Hillsborough, NJ**
Software Developer   August 2020 – March 2022
Work within a small, tight-knit software team, tasked with the complete, full-stack development and maintenance of the company's various SAAS products.
- Piloted the development of the company's flagship product – a React.js-based sales and training platform with a parallel CMS – through alpha and beta phases
- Directly responsible for the creation of the metrics pipeline tracking usage and focus statistics of the flagship product, greatly aiding in lead generation and retention for the company's clients

2U, Inc.   **Remote**
Software Development Tutor   June 2020 – February 2021
Educated students within the respective software development accreditation programs of their universities, in one-on-one sessions. Provided ongoing support for up to 20 students at any given time.
- Guided students through the fundamentals of Javascript and development, including Web Stack, API integration, and best practices
